This diagram illustrates the installation of the bottom support rail and rollers. A dashed line indicates the path of the rail being inserted into the drawer's bottom channel. Two rollers are shown being attached to the end of the rail, with arrows indicating their placement. A spring is also shown attached to the rail, likely for a soft-close feature.

A circular inset diagram showing a close-up of the corner where the cabinet meets the wall. A screw, labeled with a circled 'B', is being driven into the corner joint. The text 'x4' is written below the screw, indicating that four such screws are required for this step.
